2014 PRODUCT GUIDE

We are born to WIN. Are you?
WHAT CHAMPIONS ARE MADE OF...
WIN&WIN: ESSENTIAL FOR VICTORY!

WIN&WIN has the passion and experience that has maintained KOREA's archery dominance since the 1980s. Our staff aim for excellence with each WIN&WIN product they create. We manufacture for a world of champions, where every archer in every nation strives for perfection. A world of professionalism and power, born to win. WIN&WIN products are proven at World Championships and Olympic Games, and are continually setting new world records. But we are not satisfied. In fact, we are only just getting started...
CARBON TECHNOLOGY

DEVELOPING FUNCTIONAL ADVANCED COMPOSITE TECHNOLOGY

Athletes have high expectations of WIN&WIN. We only want to raise them. That is why we engineer innovation and optimise manufacturing processes. We combine the best quality modern carbon materials with high-tech tooling and efficient molding methods. From research and design to material testing, development and production, we improve the quality of our bows with each range we create. Our expert staff will continue to develop new and exciting techniques that keep WIN&WIN bows winning medals around the world.

You can expect excellence from WIN&WIN.

---

PRODUCTION ENGINEERING

Experienced and passionate professionals with a scientific approach, developing specialised technology to make the world’s best carbon products.

WIN&WIN CARBON TECHNOLOGY

High-tech engineering creates the best carbon material mixture for WIN&WIN bows, improving product quality and gaining athletes’ confidence.
The new INNO EX from WIN&WIN are the most stable, accurate and durable limbs available. They are first limbs infused with molecularly-bonded carbon nanotubes, the strongest modern material known to exist. Carbon nanotube resin has superior mechanical properties that produce consistent, accurate and secure limbs that effectively reduce shock. They are highly-well made, resistant to twisting and damage, and feel extremely smooth to shoot. Developed by WIN&WIN's manufacturing experts, the advanced nanotechnology in the new INNO EX is the future of archery consistency and accuracy. It is the science of shooting feeling.

EX-Composite
A supplementary nano technology, EX-Composite is an adjustment made at the molecular level to significantly strengthen and enhance the stability of the carbon nanotube matrix.

EX-Foam core
A new material used to attach the high-module carbon at strategic points inside the limbs. The nanofoam core makes INNO EX limbs smoother and gives a nicer feeling when shot.

Carbon nano-materials-carbon nanotube and graphite nanofiber-are true 21st century materials. They can be made as small as 1/10,000th of a human hair, and have superior mechanical, chemical, physical and magnetic properties. Scientists believe nano-materials are the building blocks for the next generation of engineering.
WIN&WIN BOW TECHNOLOGY

Professionals in the fields of mechanical and material engineering invite top archers and coaches to WIN&WIN's high-tech facilities to test new products. WIN&WIN equipment is created by the best and checked by the best. That is WIN&WIN bow technology.
THE SCIENCE OF SHOOTING FEELING

WIN&WIN products are designed with the archer in mind. Every innovative technology we use is part of the science of shooting feeling.

WIN&WIN BOW TECHNOLOGY

Archery specialists and composite material professionals work together at our high-tech facilities to develop each WIN&WIN product. With the right balance of expertise and passion, they deliver the science of archery every single day.

3Ss: SPEED, STABILITY & SMOOTHNESS

Lims are evaluated by three measurements: arrow speed, stability and smoothness. We research, design and develop all our bows based on these key factors. That makes sure archers love each WIN&WIN product.

THE SCIENCE OF STRING FOLLOW-THROUGH

WIN&WIN engineers know that bow performance is measured on accuracy, stability, arrow speed and how smooth it feels at the moment it is shot. The last is the most important, and the string follow-through or string reaction on release is a major indicator of whether a bow feels good.

HIGH TECH FOAM CARBON

Traditional limbs are coated in glass fiber to protect the carbon but it reduces arrow speed because it is so heavy. WIN&WIN uses a 45-degree carbon system that effectively protects, increases shooting stability and reinforces the limb against twisting.

ABSORB VIBRATION SYSTEM

WIN&WIN’s revolutionary new stabilization system specifically addresses the issue of vibration traveling back into the bow. The new HMC PLUS stabiliser’s unique design absorbs shock, improves dampening and controls torque during shooting.

CROSS CARBON LIMB TECHNOLOGY

A carbon fabric exclusively produced by WIN&WIN reinforces limbs against twisting and raises their elastic modulus. That means the limbs are stiffer, more stable and produce higher arrow speeds.

TORQUE FREE

Torque as the bow twists in an archer’s grip when they release affects arrow flight directly, and will lessen accuracy. Reducing torque within the 0.03 seconds after an arrow is released dramatically improves consistency. WIN&WIN’s TFS device absorbs shock and vibration on shooting, minimizes torque and increases accuracy.

CENTER SHOT ADJUSTMENT SYSTEM

With WIN&WIN’s unique system, limb and riser alignment can be adjusted without unstringing the bow. We also designed a highly-specialized washer that prevents limb bolts from randomly coming loose.

TOWER EFFECT

WIN&WIN’s barrelled bottom (thicker and wider) design creates an innovative tower effect. This absorbs shock during the shot and increases accuracy by removing unnecessary movement in the bow.

ALUMINUM FORGING TECHNOLOGY

Our hot forging system enhances the useful properties of all WIN&WIN aluminum products, like tensile strength and hardness.

EXTREME DURABILITY

WIN&WIN bows are made to a superior standard. During development each design must survive a 100,000-repetition durability test.

T6 HEAT TREATMENT

T6 heat treatment raises the tensile strength and elastic modulus of WIN&WIN aluminum risers, making them resilient to intense shock.

IDEAL GRIP

The WIN&WIN ideal grip is moulded to accept the joint of each finger, making drawing and aiming easier and minimizing torque during shooting.
WIN&WIN BOW SERIES

It's the innovative bow

INSPIRATION!
INGENUITY!
INNOVATION!
INNO BOW, modern WIN&WIN tradition

WIN&WIN's INNO BOW range features risers and limbs made from modern materials to suit a range of archers. The series is customisable with adjustable weight control systems, and the powerful INNO limbs fit any INNO riser. Introducing the world's best recurve bow: the INNO.

THE CHAMPION'S CHOICE

The INNO MAX is designed to stay straight and stable, minimising torque through the bow during shooting. Its multi-axial carbon pattern prevents the riser from twisting and reduces unnecessary movement as an arrow is shot. This special carbon pattern also helps absorb vibration and shock quickly.

WIN&WIN'S INNO MAX represents the pinnacle of bow development: unidirectional and royal cross carbon make it the most stable shooting riser available.

INNO CXT

INNO CXT

reddot design award

UNIQUE DESIGN : OPTIMISING CARBON

Made to maximize the properties of carbon, the INNO CXT riser minimizes unnecessary limb movement when an arrow is released. This makes shooting far more stable and efficient by lessening the wasted energy lost as vibration. The INNO CXT is so pioneering it won a Red Dot Design Award.

The problem of twisting and bending in carbon risers is a thing of the past. WIN&WIN engineers solved these issues with improvements to the molding process used to make the INNO CXT. It is possible to achieve practically perfect limb and riser alignment with WIN&WIN bows.

Many archers with draw lengths of 27”, 29” and 31” struggle to set-up a bow with a 25” riser. The INNO CXT is available in a 26” version, which makes a 67”, 69” or 71” bow with short, medium or long limbs. Do not settle for anything less than the perfect fit, choose the right WIN&WIN INNO CXT for you.

BOW TECHNOLOGY
INNO AXT

THE WORLD'S MOST ADVANCED ALUMINUM RISER

Combining the award-winning design of the INNO CXT with the trusted traditional material, aluminum, the new INNO AXT is a premier competitive riser. Forged aluminum and machined with a CNC, it significantly increases stability and accuracy in shooting. The INNO AXT has improved tensile strength by 30% over normal solid aluminum risers. The INNO AXT weighs 1340 grams and feels heavier in the hand. This new innovative riser is very stable to shoot due to the balanced weight. It is perfect for archers who prefer the confident feel of metal when they pick up their bow.

BOW TECHNOLOGY
THE WORLD'S MOST ADVANCED ALUMINIUM RISER

The stylish INNO AL1 is perfectly balanced for the ultimate shooting accuracy and consistency. There is no lateral twisting in this 25" riser, making it feel completely comfortable to shoot with. Forged aluminum and machined with a CNC, it significantly increases stability and accuracy in shooting. The INNO AL1 has improved tensile strength by 30% over normal solid aluminum risers.

The INNO AL1 weighs 1320 grams, making it feel solid in the hand and the aluminum material it is made from inspires confidence. The INNO AL1 comes in Black, Red, Blue, and White as well as three two-tone color schemes. This is a serious riser, primed and ready for the world stage.

BOW TECHNOLOGY

[Image of various logos related to bow technology]
LEADING THE WAY IN RECURVE LIMB TECHNOLOGY

The carbon outer structure of INNO EX POWER limbs is created with N-composite carbon nano technology. This is an adjustment at the molecular level that significantly strengthens and enhances the stability of the carbon matrix.

Inside the limb, the nanofoam core connects the high-modulus carbon at strategic points. It provides durability, makes the limbs smooth to shoot and enhances their overall feel.

WIN&WIN is leading the way in recurve limb technology; superior speed, stability and shooting feeling make INNO EX POWER the best carbon limb available.

INNO EX PRIME

SUPERIOR WOOD CORE LIMBS FOR SERIOUS ARCHERS

Utilising WIN&WIN's N-composite carbon nano technology, the structure of INNO EX PRIME limbs is significantly stronger, right down to its molecular carbon matrix. INNO EX PRIME contains a core made of meticulously and especially-selected wood. This makes the limb feel very stable at full draw and extremely powerful at the moment of release. Focus on your draw, aim and executing the perfect shot. Let INNO EX PRIME concentrate on delivering a consistent, stable arrow down the range.

**BOW TECHNOLOGY**
WINEX

RISER

The WINEX riser wins its fans as soon as they feel their hand nestle into its well-shaped grip. Made from strong forged aluminum, the 25" riser is stylishly designed and structured to prevent lateral twisting, making it stable and comfortable to shoot with. The handle weighs 1280 grams and comes painted.

SPECS

WINEX 25 inch
MATERIAL Forged Aluminum / Cut by Machine
MASS WEIGHT 1280g

COLOR

Royal cross carbon is the secret to the WINEX's smooth performance. WIN&WIN's 45-degree carbon system protects the surface of the limb and provides stability, while the barrelled bottom design increases accuracy by reducing unnecessary movement when the bow is shot. WINEX limbs are available in draw weights from 28lbs to 48lbs, in 2lbs increments.

SPECS

MATERIAL Royal Cross Carbon
POUNDAGE 28 ~ 48lbs
LENGTH 66", 68" & 70"

BOW TECHNOLOGY
WINACT-VT

NEW PRODUCT

RISER

The WINACT is back! As one of the most popular risers WIN&WIN have ever created, it was due a revival. Now with a fresh, modern design and a new name, the high-quality WINACT-VT is smoother to draw and aim than its predecessors. It is made from aluminum and weighs in at 1280 grams. Pick up a WINACT-VT and see how good this new version of an old favourite feels in your hand.

ACCESSORIES

WS600 SIGHT

WS600 is WIN&WIN's precision-machined competition sight, trusted by some of the world's best archers. It has wheel tuners to accurately measure fine sight movements and a slide bar for convenient and smooth vertical adjustment. A unique bolt system securely locks the sight in place.

Foam inside its carbon extension bar protects the WS600 from damaging vibration that travels through a bow when it is shot. It also keeps weight to a minimum and prevents torque during shooting.

Never compromise your aim. Choose the trust worthy, sturdy and secure WS600 sight from WIN&WIN.

The WS600 is available in four colors: Black, Red, Blue and Silver
HMC 22 STABILIZER

HMC 22 is WIN&WIN’s revolutionary new stabilizer constructed from modern high tensile strength carbon, making it stronger and stiffer. With its highly durable 3K carbon fabric surface, the HMC 22 stabilizing system has improved dampening qualities, shock absorbance and torque control.

Unlike other stabilizers the thickness of the HMC 22 tube wall varies, helping it to absorb high levels of shock very quickly. The rod wall measures 0.0275" (0.7mm) at the front and 0.0787" (2mm) at the base. This creates reduces movement at the end of the rod and absorbing vibration throughout the length of the stabilizer rather than pushing it back into the bow.

Recurve and compound archers appreciate just how smooth this innovative design makes shooting with HMC 22. The thick, 0.866" (22mm) diameter tube is also great for compound archers looking for a sturdier stabilizer.

Create your perfect stabilization system. HMC 22 is available in long rod lengths of 26", 28", 30", 32" and 34", short rod lengths of 10", 11" and 12" and extender lengths of 3", 4", 5" and 6".

1. HMC 22 absorbs vibration at the source and heavily reduces movement, while other stabilizers release vibration along their length.
2. The walls of other stabilizers stay the same thickness along the length of the rod (top). HMC 22 has a thicker wall at its base but gradually reduces to under half the size at the front (bottom).
3. A vibration wave graph shows how vibration is more effectively controlled by HMC 22 because it is absorbed progressively along the entire rod. Other stabilizers release vibration back into the riser.
Recurve archers strive for higher arrow speeds, but this results in increased vibration in the bow. Up until now, stabilizers have not been able to effectively deal with this. WIN&WIN specifically designed the HMC PLUS to address this issue. The system also improves dampening, absorbs shock and helps control torque during shooting.

While other stabilizers have a consistent wall thickness along their length that does not fully absorb vibration, the wall thickness of HMC PLUS varies. At the front of the rod the wall is 0.0275” (0.7mm) thick, gradually growing to 0.0787” (2mm) at the base. When installed with an extender as a full stabilization system, HMC PLUS effectively absorbs the shock produced by shooting a recurve bow.

HMC PLUS is available in long rod lengths of 26”, 28” and 30”; shot rod lengths of 10”, 11” and 12” and extender lengths of 3”, 4”, 5” and 6”. Choose from five striking gloss color finishes: gold, black, red, blue and or white.
**CX2 V-BAR**

Though most shock that occurs when shooting is absorbed by a stabilizer and V-Bar, some vibration returns to the riser and makes consistent accuracy difficult. WIN&WIN's new CX2 V-Bar is designed to absorb shock more efficiently, and increase shooting consistency by minimizing the vibration that returns back into the riser.

The CX2 V-Bar is available in three fixed angles: 30, 40 and 45 degrees.

---

**CX V-BAR**

The CX V-Bar is an all-carbon proven performer, far better at absorbing vibration than its aluminum competitors. It is also significantly lighter and WIN&WIN's unique 'rolling' technology greatly increases its dampening characteristics. Shooting with the CX V-Bar feels stable and smooth, something you will struggle to achieve with an aluminum v-bar.

The CX V-Bar is available in three fixed angles: 30, 40 and 45 degrees.

---

**BW DAMPER & BW SHORT DAMPER**

WIN&WIN new BW dampers are made from an absorbent rubber material that nearly eliminates vibration during shooting and controls poor movement in equipment after the shot.

BW dampers are available in 2 sizes in length:
- 40mm(BWD)
- 25mm(BWD Short)

Thread size: 5/16-24(F) x 1/4 x 20(M).
ACCESSORIES

WT DAMPER (WTS, WTW)
WIN&WIN's WT Dampers are outstanding at absorbing vibration and increasing dampening in a stabilization system. Using a special formula of TPU plastic, WT Dampers eliminate shock and greatly reduce noise.

WT Dampers are available in three colors: Black, Red and Blue.
Thread size: 5/16-24(F) X 1/4-20(M)

MINI DAMPER (MDW)

Mini Dampers are the most efficient small anti-vibration device, and can be installed as part of a stabilization system to help absorb shock.

Mini Dampers are available in four colors: Black, Red, Blue and Orange.
Thread size: 5/16-24(F) X 1/4 X 20(M)

WK500 CUSHION PLUNGER

Well-engineered from high-quality components, the WK500 Cushion Plunger has a very smooth button action and micro click adjustments for fine bow tuning.

The WK500 Cushion Plunger is available in four colors: Black, Red, Blue and Silver. Thread size: 5/16”-24.
Adjustable length: min 17.5mm - max 24.0mm (24mm pressure point);
min 24.0mm - max 29.0mm (29mm pressure point).

CARBON CLICKER

WIN&WIN's Carbon Clicker is light, precise and designed to fit snugly onto any riser. The matt black carbon blade gives a clear 'click' on every shot.

The Carbon Clicker is available in three thread sizes: 6-32, 4-40 and M4.
BEARING ARROW REST

WIN&WIN's recurve arrow rest uses a flipper-style arm to improve accuracy and ensure smooth shooting. It incorporates a bearing that tightens groups on the target while providing superb clearance. The arm is stiff and stable, minimizing the vertical movement that interferes with clean arrow flight.

The Bearing Arrow Rest is available in Black and Silver, for right-handed (RH) and left-handed (LH) archers.

360 CORDOVAN FINGER TAB

Designed with archers' comfort in mind, the new 360 Cordovan Finger Tab is a high-quality and dependable genuine leather recurve finger tab.

The 360 Cordovan Finger Tab is available in Small, Medium and Large sizes, for right-handed (RH) and left-handed (LH) archers.

AT-100 ARM GUARD

The new AT-100 Arm Guard has a skeleton-like structure with all the unnecessary parts cut out, making it extremely light and comfortable to wear. Its smooth outer surface creates less friction when impacted by the string.

The AT-100 Arm Guard is available in six vibrant colors: Black, Red, Blue, Orange, White and Green.
WECOUSE CHEST GUARD

Ergonomically designed to sit securely and consistently on the shoulder and around the chest shot after shot, WECOUSE Chest Guard was designed by archers for archers!

The WECOUSE Chest Guard is available in Medium and Large sizes, for right-handed (RH) and left-handed (LH) archers in two colors: Black and White.

MAGNETIC QUIVER

This sharp-looking new accessory does not just look aesthetically pleasing, but keeps arrows safe and still. Magnets in the bottoms of each of the three arrow tubes-four on the Large version-ensure shafts stay secure inside the Magnetic Quiver, which is available in Black only.

The Magnetic Quiver is available in Medium (3 arrow tubes) and Large (4 arrow tubes) sizes, for right-handed (RH) and left-handed (LH) archers.

ABS BOWCASE

Protecting archery equipment is essential, and that is why the ABS Bowcase has such a solid outer shell. The smart design includes an extendable trolley handle, but does not sacrifice space for its impressive durability. Inside, there is plenty of room to store and organize a variety of archery gear.

The ABS Bowcase is available in two colors: Black and Silver.
Inner size: 830 X 330 X 205 (mm).
Outer size: 878 X 348 X 219 (mm).
TY MULTI BOW STAND

Suitable for indoor and outdoor use, the TY Multi Bow Stand is solidly built and a reliable bow support in all conditions. It is light yet strong and durable, its flip-lock legs fold up for easy storage and comes with two types of cradle head.

The TY Multi Bow Stand is available in Silver only.

1. Standing cradle head
   - Especially comfortable for indoor use
   - Suitable for holding an unstrung bow
   - Supports a more accurate bow tuning set-up

2. Sitting cradle head
   - Very useful outdoors
   - Excellent stability when placed on grass or on a windy day
   - Designed for use with both recurve and compound bows

STRETCH BAND

Used as an exercise tool, the SCAPOWER Stretch Band will increase an archer’s pulling weight, build up muscle and develop firmness in the shoulder. It can also be used to improve posture and technique.

Daily practice is recommended: 10 minutes at a time with at least a 2 or 3 minute break. It does not take long to see improvement in shot placement, draw process and balance in the bow shoulder. Try it for yourself!

ARROW PULLER

The solid gripping surface on WIN&WIN’s arrow puller makes retrieving arrows from the target safe and easy. It fits comfortably in the hand, includes a keyring for attachment to a belt or pack and is shaped like a cat!

GRIP MAKER

Some archers find a custom-fit grip improves their shooting. Make your own grip quickly and easily with a WIN&WIN grip maker resin kit.

W&W Gripper resin is available in 300g and 25g quantities.
